

COURSE OVERVIEW

This 3 month Monitoring, Evaluation, and Learning (MEL) Accreditation Course is crafted to empower development professionals with a solid mix of comprehensive and practical skills in MEL. Participants will gain the know-how to design and implement results-driven MEL systems, manage data efficiently, conduct evaluations, and offer consultancy services across various development and humanitarian settings. The course focuses on hands-on learning through real-world assignments, collaborative exercises, and a capstone project that mimics a consultancy engagement. It also weaves in emerging themes like electronic MEL platforms, earned value management, and the use of AI tools in MEL processes.

COURSE CONTENT

At the end of this course, the participants will be able to:

Master the essentials

Of project management and MEL, understanding how they connect, why ethics matter, and how results-based approaches drive impact.

Turn challenges into strategies

By diagnosing problems, setting clear objectives, mapping stakeholders, and crafting powerful Theories of Change.

Build strong mel systems

By designing comprehensive plans, selecting the right frameworks, creating measurable indicators, and setting achievable baselines and targets.

Harness technology for impact

Through practical skills in monitoring, data management, quality assurance, and use of electronic MEL platforms for efficient data capture, analysis, and visualization.

Deliver high-quality evaluations

By choosing the right designs, applying sound methods, maintaining ethical integrity, and writing clear, actionable Terms of Reference.

Embed MEL in organizational

Culture by fostering ownership, continuous learning, and participatory approaches that sustain results.

Succeed as a MEL consultant

By understanding the full consultancy lifecycle from identifying opportunities to delivering client-ready results culminating in a hands-on Capstone project.

Registration Ongoing
